

Inventors need to start
with a question!

There is a strange saying that says "Necessity is the mother of invention" and what it means is if you can't get something you need you will probably invent it.

Early Man is a great example of this saying because he had nothing!

How can I
keep warm?

Invent
fire!

How can I
catch diner?

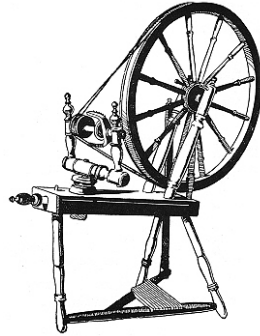

Invent a
spear!

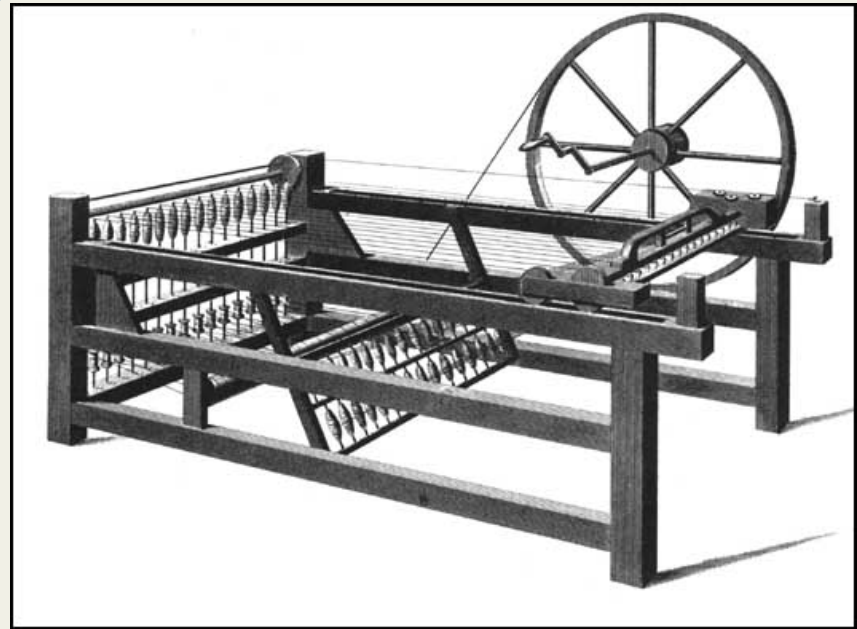

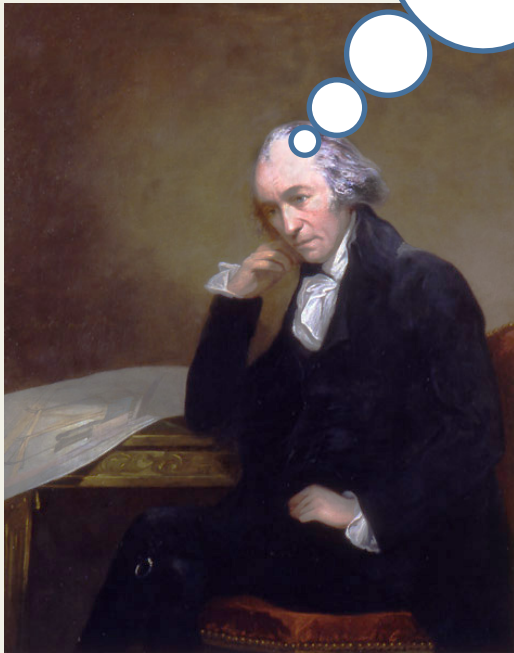

Here are some other inventions that might have been developed as a result of a question.

How can I spin quicker?

This question might have prompted **James Hargreaves** to invent the Spinning Jenny in 1764.

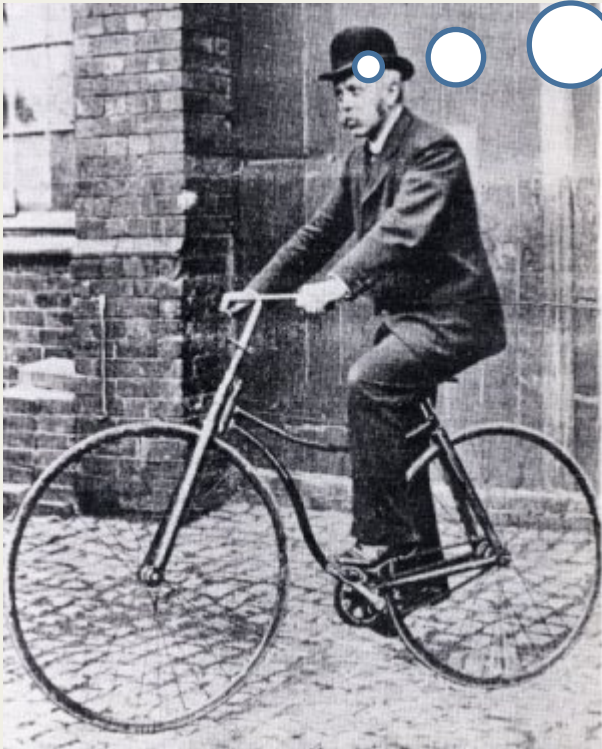

How can I speak to someone in a different place?

This might have been the question **Alexander Graham Bell** asked when he invented the telephone in 1876.

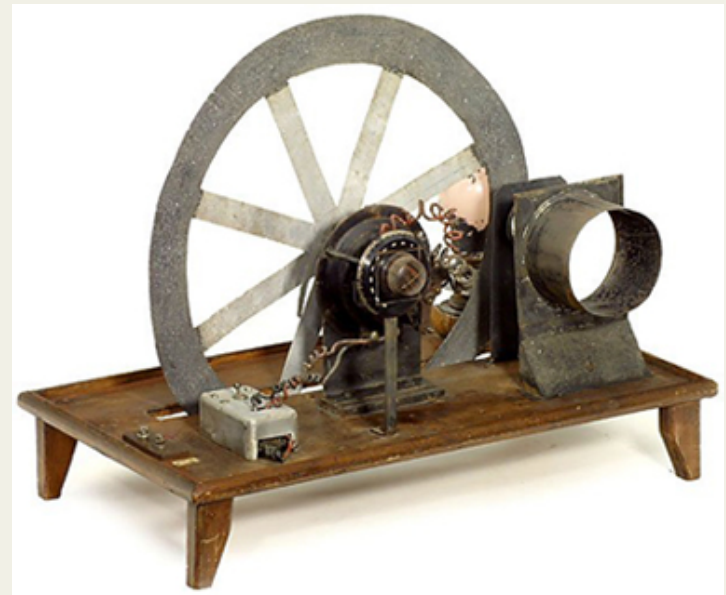

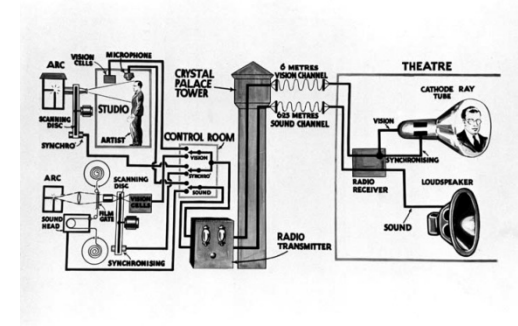

How can a make cycling more enjoyable?

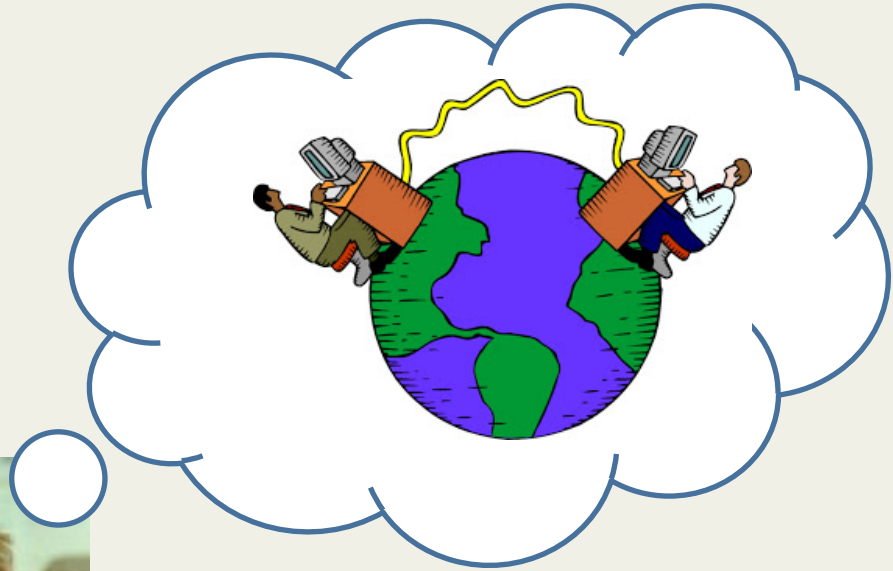

This might have been the question **John Stanley Kemp** thought about when he invented the **safety bicycle in 1885**.

How can I show live pictures in my home?

This might have been the question **John Logie Baird** thought of when he invented the television in 1926.

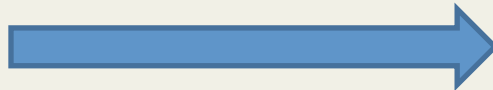

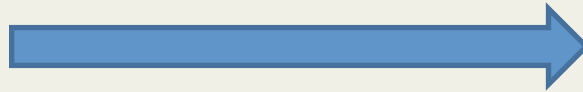

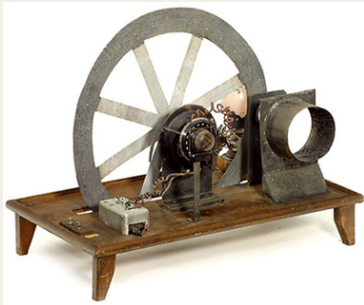

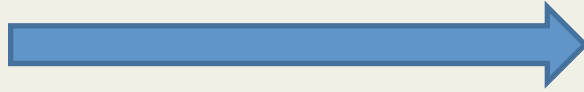

How can people around the world share information?

This might have been the question **Tim Berners Lee** asked when he invented the **World Wide Web (www.)** in **1991**.

If they are good inventions can last a long time –
with a few changes!

What other inventions do you know of?

Where could you look to find out information?
